SWF/KX-T1502D

SWF

Machine Specifications

Max Speed	Normal	1,200 spm
	Cap	1,000 spm
Embroidery Field	Tubular	520 x 360 (mm)
	Cap	360 x 75 (mm)
	Border	520 x 360 (mm)
Memory Capacity		40,000,000 Stitches
Power Supply		100~240V , 50Hz / 60Hz
Power Consumption		240W

Demensions

Length

A. 2,050mm
B. 1,710mm

Width

W. 770mm

Height

A. 1,750mm
B. 1,100mm
C. 650mm

Optional Devices

| Sequin Device	Cording Device	Boring Device	Pocket Frame
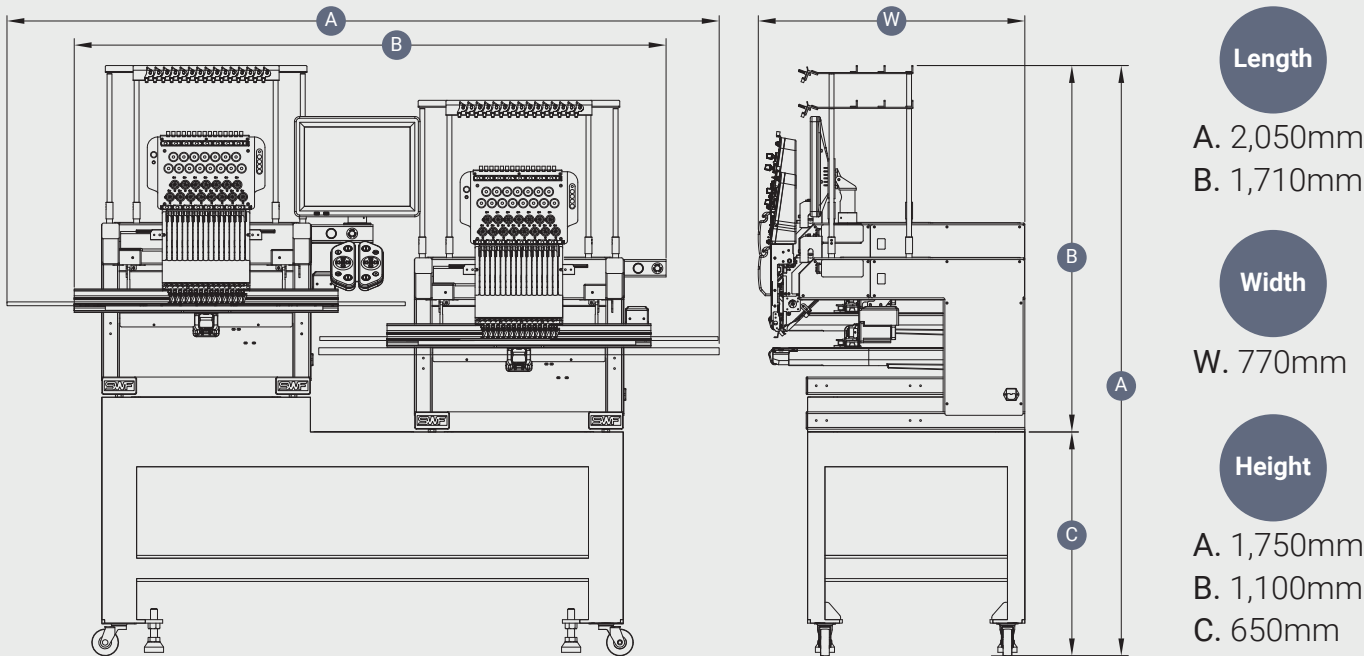

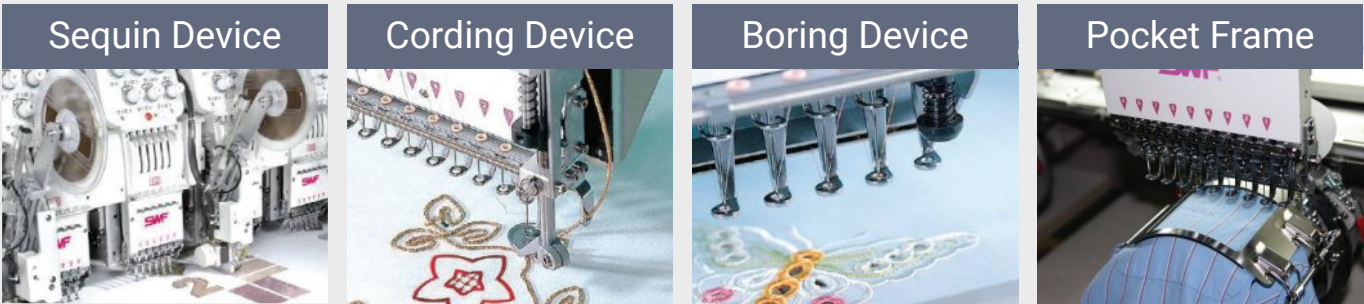

* Machine specifications are subject to change without prior notice.

SWF
KX DUAL Series

## Smart Dual Function Automatic Embroidery Machine

New Technology

Smart Action Presser Foot

Smart Action Presser Foot (SAP) adjusts the height of the presser foot automatically by way of an independent presser foot motor.

Regardless of the thickness of the fabric, the best quality embroidery can be completed easily with SAP.

Adjust the minimum height of the presser foot by setting preferences on the operation panel.
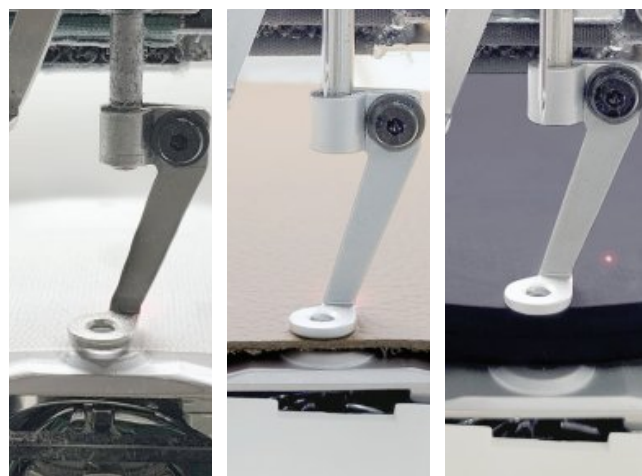

Slim Cylinder Arm

Redesign of the cylinder arm improves the quality of embroidering on products

Reduction of the cylinder bed circumference to 170mm

Reducing working space between the needle plate and cap frame.

Easy Change Cap System
(Factory Option)

The Cap Frame has been re-designed and is lighter and stronger. Switching between cap frame and tubular frames is quick and easy (using thumb screws) - no tools required.

This allows the users to efficiently manage their working hours and improve productivity by operating machine in high-speed.

Smart Tension System
(Factory Option)

Smart Tension System (STS) automatically adjusts the thread tension by analyzing the stitch type and machine speed.

Produce consistently high-quality embroidery with STS and reduce lost productivity in manual adjustment of thread tensions.

Key Features

15 inch Full Touch LCD

15-inch touch screen Operation Panel, allows the user to easily view settings and embroidery status.

It offers many other advanced features including Free-Hand Stitch Function, Smart Embroidery System (SES), design selection per a needle, etc.

Arm Angle Improve

Compared to the old SWF machines, the angle improved from 44 degrees to 54 degrees.

Working on cap embroidery,
Big advantageous in that it does not interfere with the cap brim. Implemented of the highest quality machine of cap embroidery.
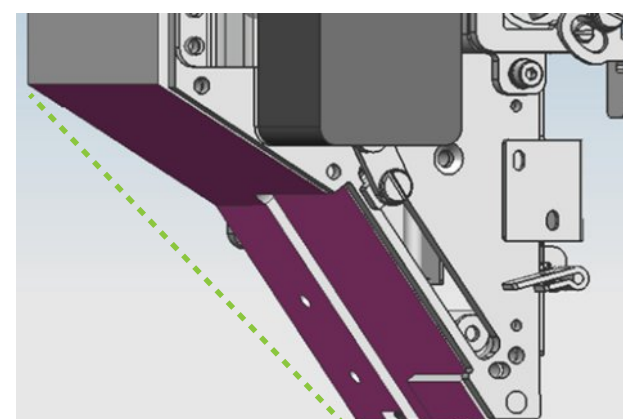

Dual Function

SWF KX Dual machine can embroider two different items and patterns at the same time.

Dual machine can operate as one unit or two separate units, depending on the purpose. It can control two operating systems with a single LCD panel.

Dual function, designed to maximize customer efficiency, is only available in SWF.

SWNS

SWF "SWNS" (Sunstar World Networking System) allows you to network your SWF embroidery machines with a Wireless system. Send and download designs to and from your Embroidery machines via WiFi connectivity. Connect up to 200 machines. Reduce machine down time and increase productivity. (Compatible with SWF Embroidery Machines MAS, KE, KS, KX Series)

PC (SWNS)   Access Point   Wireless Receiver   SWF Embroidery Machines
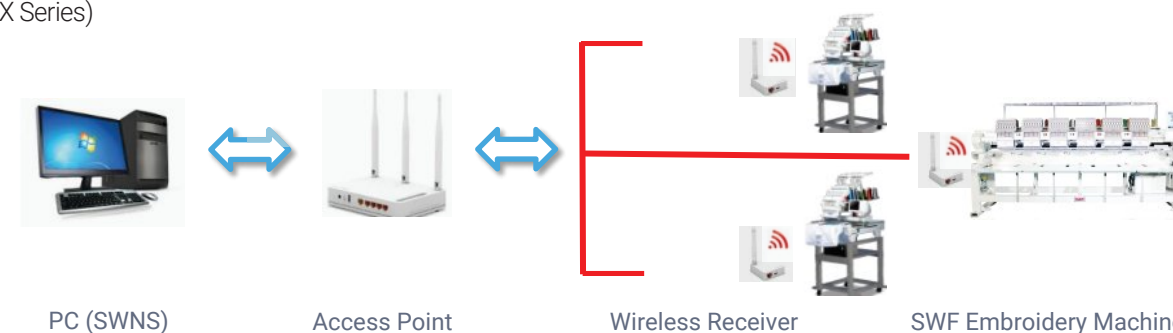

*The router (Access Point) and Wireless receivers are not included.
